

"The revolution, when it comes, will be engendered by the advent of autonomous or "self-driving" vehicles. And the timing may be sooner than you think."

Il devient urgent de penser l'automobile du futur en replaçant l'objet à sa place dans un système global. Il devient urgent de penser le futur de l'automobile dans le monde qui vient. Mais pour voir le monde qui vient, il faut retrouver les compétences des explorateurs et accepter de se former à de nouvelles formes d'intelligences collectives.

"New Models for Vehicle Ownership Self-driving vehicles could contribute to a significant redefinition of vehicle ownership and expand opportunities for vehicle sharing (imagine Zipcar on steroids). If vehicles can drive themselves, they can be summoned when needed and returned to other duty when the trip is over. Thus, travelers would no longer need to own their own vehicles and could instead purchase mobility services on demand."

"Who will play the leading role in this ecosystem when self-driving becomes a reality? Who will create value, and who will claim it in the self-driving ecosystem?"
